A swimming pool is to summer
what an open fire is to winter!

It's what makes the season special and
brings the family together. It's where
children come to splash and play,
it's where mums and dads relax and let
the cares of the world just float away.

Here in Australia we're lucky. The summers are hot and long. Unsurprisingly, the backyard pool has become part of our culture, a time-honoured tradition that we at Stern's have been encouraging and supporting for over forty years.

We believe that every Aussie family is entitled to fun-filled days around their own pool.

And so we design and build a range of above-ground and in-ground pools that suit every size of garden and every size of wallet.

For the price of a family holiday, we can help turn your backyard into a resort that you can visit every day of the week for free!

No need to travel.

Just stay where you are and flip through the pages of this brochure!

More splash for your cash!

What makes a Stern's pool the best your money can buy?

Quality

Unlike many of our competitors, Stern's pools are made right here in Australia. We're the only manufacturer to use the thickest, highest quality, galvanised, BlueScope steel.

Our work is engineered to last and hand-finished to the most exacting standards.

Flexibility

Our pools are based on modular designs. This means you can choose a shape that fits the style of your home and a size that will fit the space in your garden.

Easy Installation

A Stern's pool is so easy to install that it's often done in just one day.

What starts as a bare patch of ground in the morning can be sparkling water by the time you go to bed. (After a quick dip!)

Minimal Maintenance

We want you to spend your time enjoying your pool – swimming in it or lounging beside it - not worrying about the water!!!

So we've designed our pools and equipment to keep maintenance to an absolute minimum.

Affordability

Our range of beautiful pools will enable you to achieve the look and feel of a concrete or fibreglass pool but at a fraction of the cost.

Guarantee

Forty years of experience has taught us how to produce pools of the highest quality and durability and so we have the confidence to issue a minimum 10-year warranty.

Above-Ground Pool

Semi In-Ground Pool

In-Ground Pool

What exactly is a modular pool?

‘Modular’ is the technical term for what has often been called an ‘above-ground’ pool. But, these days, there’s a great deal more to it than that.

Our modular pools use a range of panels and components that can be configured to create pools of different sizes, shapes and depths.

This makes them extremely versatile, affordable and both quick and easy to install.

Our range extends from the simple to the sublime. Whatever your budget, whatever space available, you’ll find there’s a Stern’s pool that will be right for you.

Above-Ground Pools

These pools sit on level ground and can be installed very quickly and cost effectively. If you move home, they can even move with you!

Semi In-Ground Pools

These pools are perfect for uneven ground where both excavation and decking are necessary.

In-Ground Pools

These pools can be decked and landscaped to achieve the look and feel of the most expensive concrete or fibreglass pools but at a fraction of the cost.

OUR POOLS:

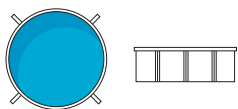

Mission Beach

The Mission Beach is our entry level pool and the most affordable in the Stern's range.

It has been designed specifically to be installed above ground. The slimline posts and framework are topped with a wider coping that makes getting in and out much easier. The combination of birch grey wall and white framework gives this pool a sleek look that is perfect for any modern backyard.

As with all Stern's pools, the Mission Beach is covered by a 10 year pro-rata warranty.

- Australian made
- Birch Grey 1.2m wall height with white framework
- Unique 100mm top coping delivers strength and safety
- Slimline posts maintain pool strength
- Braced structural design
- Durable 0.5mm liner
- Marine grade nuts and bolts – designed for use around water

ROUND
3.76 x 1.2m
4.56 x 1.2m
5.34 x 1.2m
6.50 x 1.2m

OVAL (3.80m Wide)
5.00 x 3.80m
6.20 x 3.80m
7.40 x 3.80m
8.60 x 3.80m

OVAL (4.56m Wide)

8.16 x 4.56m
9.36 x 4.56m

Colour Scheme
Birch Grey

Sanitisation
Granular Chlorine

NB: All sizes available
in 1.2m high walls.

OUR POOLS:

Lindeman

The Lindeman pool is Australia's strongest semi-inground pool and has been designed to give you years of hassle-free enjoyment.

Featuring a braceless structure, the Lindeman is constructed from the highest quality materials from BlueScope Steel and is engineered for above, semi and in-ground installations.

As with all Stern's pools, the Lindeman is covered by a 10 year pro-rata warranty.

- Australian made
- Exclusive 170mm wide top coping with matching single piece connector
- Braceless design minimises excavation and creates a streamlined look when installed above ground
- 1.2m birch grey walls with white framework
- Marine grade nuts and bolts – designed for use around water
- True 0.5mm heavy duty liner

ROUND

3.76 x 1.2m

OUR POOLS:

Palm Cove

The Palm Cove is Australia's strongest modular pool system and has been designed to give you years of hassle-free enjoyment.

Featuring a braceless structure, the Palm Cove is constructed from the highest quality materials from BlueScope Steel and is engineered for above, semi and in-ground installations.

As with all Stern's pools, the Palm Cove is covered by a 10 year pro-rata warranty.

- Australian made
- 170mm wide resin coping with rounded edges for safety
- 1.37m wall height giving you greater water depth
- Marine grade nuts and bolts – designed for use around water
- True 0.5mm heavy duty liner as standard

ROUND

3.76 x 1.37m

OUR POOLS:

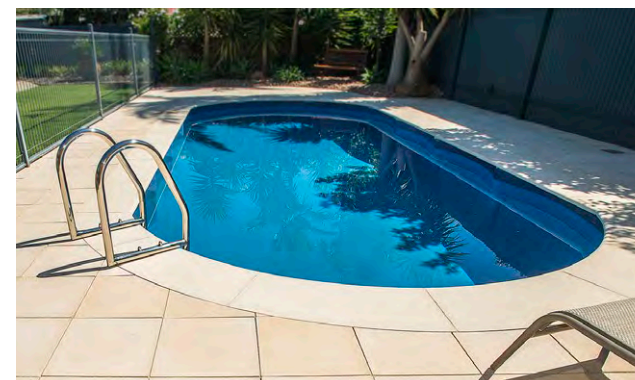

Whitsunday

The Whitsunday is our top of the range and most popular pool. It's been re-engineered to use all-resin components that make it highly resistant to corrosion and suitable for both liquid chlorine and saltwater systems.

Saltwater has the advantage of being gentler on the skin and easier to maintain. And, as it uses less chemicals, it's also cheaper to run.

The Whitsunday has been engineered for above, semi and in-ground installations and comes with a 15 year limited warranty.

- Australian made
- Top coping and vertical posts are fully UV-treated for the demands of the Australian climate
- Resin top coping replaces metal – rounded for safety and ribbed for grip
- Resin vertical posts replace metallic posts
- Metallic components have been electro-coated for added protection to the existing galvanic protection
- Updated resin post plates and top rails
- Marine grade stainless steel nuts and bolts designed for saltwater use.

Liners

Stern's liners can be fitted to any new or existing above ground pool including round, oval, keyhole or raindrop shapes. Our liners are suitable for use in both chlorinated and salt water pools.

Sterns are the only modular pool manufacturer in Australia to make all our liners in-house, ensuring the highest standards of workmanship and a perfect fit for every pool.

Our pool liners come with a 10 year limited warranty. All of our liners are treated with UV inhibitors and special anti-bacterial applications which will:

- extend the life of the liner
- reduce the maintenance required for your pool
- enable you to spend more time enjoying the lifestyle that comes with owning a backyard pool.

Ladders

As Stern's pools come in many shapes and sizes, we provide a range of ladders and stairs to ensure it is easy and safe to get in and out of the water.

Made of either metal or high-density plastic, there are four designs that are made to meet specific requirements.

Skimmer Pool

The perfect choice for swimming pools with skimmers. These ladders offer rigid stability and are a stylish design for both commercial and residential pools.

In-Deck Ladder

Extra high, extra strong climb rails allow stable hand placement and more support.

Adjusts to virtually any pool or deck height.

High density, structural plastic supports users up to 110kg.

Strong structural construction supports users up to 120kg.

A Frame Ladder

Height adjustable legs ensure a level entry into the pool.

Removable entry stairs. stop unauthorised access to your pool.

Extra high handles provide comfortable and stable access.

Strong structural construction supports users up to 120kg.

Slimline Step

Designed for in-ground pools or pools with a deck surround.

Large hand rails make getting in and out of your pool easy.

Creates an island where you can sit and relax.

Heavy duty moulding supports users up to 140kg.

Some FAQs

What's the difference between an 'modular' pool and an above-ground or in-ground pool?

As the name suggests, a modular pool is made of panels and elements that can be configured to create a range of shapes and sizes. In many respects, it is the next generation of above-ground pools.

Both can be installed above ground, but a modular pool can rest partially in-ground if the site is not level and some excavation is required. An in-ground pool is usually made of fibreglass or concrete and is both expensive and difficult to install.

However, a modular pool can be also installed in-ground and achieve the same look and feel but for a fraction of the cost.

How long do modular pools last in the ground?

With proper maintenance, we expect our pools to last for 15-20 years. We've seen them last for a lot longer. And we issue a minimum 10-year warranty.

What are Stern's pools made of?

The structure is made from the thickest galvanised steel available on the pool market. The walls are made from Australian BlueScope Flexographic steel.

Where are Stern's pools made?

We're a proudly Australian company. All of our pool structures and PVC liners are made in our factory in Lurnea, New South Wales.

What are the pools lined with?

Our pools are made with premium quality, coloured PVC that is shaped and welded to fit your pool at our factory in New South Wales.

What shapes are available?

Across the range there are five basic shapes – round, oval, rectangular, keyhole and raindrop. As our system is modular, some models can be built to custom specifications.

How deep can my pool be?

As long as you choose a pool that is at least 3.8 metres wide, we can build a pool that is up to 1.8 meters in depth. (Our standard depths are 1.2 and 1.37 metres.)

Will I need council approval to install a pool?

Yes. Regulations vary from state to state. You'll need to go to your council website or offices to submit an application.

How do I determine what pool is right for me?

We'll help you. There are a number of factors to consider – the size and level of your block of land, the shape you feel would suit your backyard, how the pool will be used and so on.

Our website has an interactive selector to assist you and we're more than happy to help you answer these questions over the phone.

Will my pool require a surrounding fence?

Almost certainly. Your council planning department will give you the exact specifications of any barriers required.

How long does installation take?

With a professional installer, as little as one or two days.

Which filter is best for my pool?

There are a range of factors to consider – local environment, weather, pool size, water type and personal preference. We, or your installer, will be very happy to advise.

Can I install lighting in a modular pool?

Yes you most definitely can. Contact us for a range of options.

How much do modular pools cost?

As a DIY project, your budget could be as little as \$3000! Full installation would come closer to \$10,000.

Do Stern's pools come with a warranty?

Yes. All Stern's pools come with a minimum 10-year warranty.

Do you have a display centre?

Yes. Our NSW showroom is at 330 Hoxton Park Road, Lurnea and open from 8.00am – 5.00pm during the week and by appointment at the weekend.

At our website, sternspools.com.au, you can find details of our nationwide network of distributors, many of whom have pools on display.
